## REVIEWER'S REPORT

Manuscript No.: IJAR-50269

Date: 14/02/2025

**Title:** "Cornual Ectopic Pregnancy: A Case Report."

**Recommendation:**

- Accept as it is .....Yes.....
- Accept after minor revision.....
- Accept after major revision .....
- Do not accept (*Reasons below*) .....

Reviewer Name: Dr. Sireesha Kuruganti

**Date:** 14/02/2025

**Reviewer's Comment for Publication.**

*(To be published with the manuscript in the journal)*

*The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.*

The manuscript presents a well-structured and thorough account of a rare and high-risk case of Cornual Ectopic Pregnancy. By incorporating the following detailed suggestions, the manuscript can be further refined and provide valuable insights for clinicians managing similar cases.

## REVIEWER'S REPORT

- \*Title (Lines 27-28):\* The title is clear and informative. However, consider specifying that it's a "Case Report" to immediately inform readers of the manuscript type.
- \*Abstract (Lines 29-33):\* The abstract provides a concise summary but can be improved by highlighting the main diagnostic and management challenges. For example, mention the patient's critical condition and the specific surgical intervention performed.

### ### Introduction:

- \*Introduction (Lines 35-42):\* The introduction effectively sets the stage by explaining the rarity and risk of CEP. To enhance it, provide more background on the epidemiology and pathophysiology of CEP. This could include data on the incidence rates and the anatomical challenges associated with CEP.

### ### Case Presentation:

- \*Patient Information (Lines 44-55):\* The case presentation is detailed and thorough. It describes the patient's demographic information, clinical presentation, and initial assessment clearly. The inclusion of vital signs and examination findings is commendable.
- \*Diagnostic Workup (Lines 56-64):\* The diagnostic workup section is well-documented, including blood tests and ultrasound findings. It would be beneficial to include more details on the ultrasound technique used and how it contributed to the diagnosis. Additionally, consider discussing any differential diagnoses that were considered.

### ### Discussion:

- \*Discussion (Lines 71-102):\* The discussion provides a comprehensive analysis of CEP, including risk factors, clinical presentation, diagnosis, and management. The detailed description of risk factors (Lines 73-76) is valuable. However, a comparison with other types of ectopic pregnancies could highlight the unique challenges of CEP.
- \*Ultrasound Findings (Lines 90-91):\* The ultrasound findings are accurately described. Including specific sonographic images and discussing their diagnostic value would enhance the manuscript's value.
- \*Management and Outcome (Lines 93-106):\* The management strategy is well-explained, detailing the surgical intervention and postoperative care. Consider discussing alternative management approaches and their potential outcomes. Additionally, include information on the patient's recovery and follow-up.

### ### Conclusion:

- \*Conclusion (Lines 109-116):\* The conclusion effectively summarizes the key points and emphasizes the importance of early diagnosis and intervention. To strengthen it, add a brief discussion on future research directions and potential improvements in CEP management.

### ### References:

- \*References (Lines 118-135):\* The references are relevant and up-to-date. Ensure they are formatted consistently according to the journal's guidelines. Including more recent studies on CEP could provide additional context and support for the manuscript's findings.

### ### Figures:

- \*Figures (Lines 53-61):\* The inclusion of figures enhances the manuscript's clarity. Ensure all figures are referenced appropriately in the text. Adding more explanatory captions to the figures can help readers understand their relevance.
