Reviewer's Comment for Publication.

(To be published with the manuscript in the journal)

The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.

Demographic parameters are statistical measures that describe the characteristics of a population. They are used to study how populations change over time.

Detailed Reviewer's Report

- 1. Estimation of demographic parameters refers to the statistical process of calculating population characteristics like birth rates, death rates, migration rates, and age structure by analyzing data from a sample of the population.**
- 2. Researchers to understand population dynamics and trends over time. This is often done using methods like mark recapture analysis**

REVIEWER'S REPORT

or population modeling, depending on the study organism and available data.

- 3. Exploitations cheptel is a French phrase that translates to livestock exploitation . The word cheptel is a masculine that means livestock.**
- 4. Livestock are the domesticated animals raised in an agricultural setting in order to provide labour and produce diversified products for consumption such as meat, eggs, milk, fur, leather and wool.**
- 5. Informations of review points are good and sufficient. Flow charts of review points can be added. It would be good to understand easily.**
- 6. Tables with results and graphs are perfect.**
- 7. Summary parts can be included.**
- 8. Allignments and corrections must be needed.**
- 9. After minor corrections this research findings are value to publish in your reputed journal**
