**Reviewer's Comment for Publication.**

*(To be published with the manuscript in the journal)*

*The reviewer is requested to provide a brief comment (3-4 lines) highlighting the significance, strengths, or key insights of the manuscript. This comment will be Displayed in the journal publication alongside with the reviewers name.*

The Choroid plexus is a complex network of capillaries lined by specialized cells and has various functions. One of the primary functions is to produce cerebrospinal fluid via the ependymal cells that line the ventricles of the brain.

### *Detailed Reviewer's Report*

- 1. Choroid plexes papilloma is a rare, typically benign brain tumor that grows in the choroid plexes, the tissue responsible for producing cerebrospinal fluid and is most common in children.**

**REVIEWER'S REPORT**

- 2. An intraventricular mass is a tumor or lesion that develops within the brains ventricles, the fluid filled spaces that surround and cushion the brain and spinal cord.**
- 3. These can be benign or malignant and include conditions like ependymomas, choroid plexus tumors and colloid cysts.**
- 4. A benign tumor is a non cancerous growth of cells that does not spread to other parts of the body. It is typically localized and remains in the area where it originated.**
- 5. In pathology papillary architecture refers to a nipple like projection of tumor cells arranged around a fibrovascular core, often seen in certain types of cancers like renal cell carcinoma and papillary thyroid carcinoma.**
- 6. This research findings are medicinally very valued one. But informations are very less. Histopathology structures are good with inforamtions.**
- 7. Can be given in significant points of research flow chart way in introduction part.**
- 8. There is no summary parts.**
- 9. Can be Taken to this research next level.**
- 10. References should be in alphabetical order.**
- 11. After minor corrections can be published in your journal.**
