Introduction:-

Migraine can be challenging diseases to diagnose because it is a clinical diagnosis based on symptom that are subjective and verified able only by the patient. The classification and diagnostic criteria for headache disorders that the International Headache Society (IHS) published in 2013 have given both researcher and physician a systematic method for establishing diagnosis of migraine. According to one study, only 4% of the total population had never had a headache at present 15% to 18% of women and 6% to 7% of men are reasonable for the prevalence of all type of migraine during the previous one-year period: 12% to 33% of women and 4% to 22% of men are estimates for the lifetime prevalence of migraine as define by HIS criteria.

Case Proper:

Present Complaint:

A 36 years old lady came with complaint of pain in left side of head in fore head region along with blurred vision and weakness. Initially before 24/08/2023 patient was completely healthy, the patient had pain in right foot and pain head started severely. Pain in forehead extending, up to occipital region of head, looks sleepy, with vision weak. agg from reading and mental strain, eye opening, from last 7 months. vision weak, as if mist before eyes, specs not adjusted well on next day morning (25/08/2023), she came to me for consultation. after thorough case taking migraine without aura

Generalities:

Thermal Reaction- Hot Patient

Appetite- Good, Normal, regular

Thirst- Thirsty 2-3 lt/day

Desire- Spicy, chines food

Aversion- vegetables

Tongue- Clean, moist

Perspiration- Upper lip, axilla,chest.

Stool- soft, normal, regular

Urine- Clear, normal

Sleep- Wake up early (5am)

Menses- Regular, 2/30 days, Pain before menses which subsides after appearance of flow.

Analysis and Evaluation as per Dr.Boenninghausen;

Location- Head pain left side,forehead.

Sensation-Pulsating, Hammering, Heat, Fullness

Modality-< Menses before, hot weather, Spring >Sleep, clothes loosening, rising from seat after

Concomitants- Thirst, flatulence, cracks, scales, bleeding

Repertorization: BTPB

Timeline and Intervention:

24/08/2023

R_x Lachesis 30 (BDx3Days)

Placebo 200 (BDx21Days)

18/09/2023

Pain in head and foot for 1 days (i.e.- 17/09/2023)

Flatulence is Decreased

Thirst- increased

No new symptoms

R_x Lachesis 30 (BDx3Days)

Placebo 200 (BDx30Days)

16/10/2023

Pain in head dull type for 3days (i.e. 12/10/2023-14/10/2023)

No Flatulence

No new symptoms

R_x Lachesis200 (ODx3Days)

Placebo 200 (BDx30Days)

13/11/2023

No Pain in head

No Flatulence

No new symptoms

R_x Placebo 200 (BDx30Days)

11/12/2023

Pain in head only for 1 day (i.e.-08/12/2023)

No Flatulence

R_x

Placebo 200 (BDx30Days)

22/01/2024

Pain in head only for 1 day (i.e.-18/01/2024)

No Flatulence

No new symptoms

R_x Placebo 200 (BDx30Days)

05/02/2024

No Pain in head

No Flatulence

No new symptoms

R_x Placebo 200 (BDx30Days)
